p.veerendra5369@gmail.com | +91 9491651224 | Visakhapatnam, Andhra Pradesh

Professional Summary

B.Tech Artificial Intelligence & Machine Learning undergraduate with strong fundamentals in programming (Java, Python, C), Object-Oriented Programming (OOPs), Data Structures & Algorithms, DBMS, and the Software Development Life Cycle (SDLC). Hands-on experience in full-stack web development, machine learning, and computer networking through internships and academic projects, with proven ability in debugging, testing, and structured problem-solving. Strong analytical thinking, logical reasoning, communication, and teamwork skills, with a quick-learning mindset and enthusiasm for enterprise software development and emerging technologies.

Technical Skills

Programming Languages: Java, Python, C
Programming Concepts: OOPs, Data Structures & Algorithms, SDLC, Problem Solving, Debugging, Testing
Web Development: HTML, CSS, JavaScript, Node.js, Flask
Databases: SQL, MySQL, MongoDB, DBMS
AI & Machine Learning: Machine Learning, TensorFlow/Keras, OpenCV, scikit-learn
Tools & Practices: Git/GitHub, VS Code, Team Collaboration
Professional Skills: Communication, Teamwork, Analytical Thinking, Adaptability, Time Management, Learning Mindset

Internship Experience

Web Development Intern – Thiranex **May 2026 - Jun 2026**
- Gained hands-on exposure to real-time web application development, applying structured problem-solving and debugging across the development lifecycle.
- Collaborated on development tasks, strengthening skills in coding, testing, and issue resolution.

Python Intern – Oasis Infobyte **Sep 2025 - Oct 2025**
- Developed Python-based projects applying core programming concepts, logical reasoning, and debugging to practical problem-solving tasks.
- Strengthened coding, testing, and solution-development skills through hands-on implementation.

Computer Networking Intern – City Online AP Pvt Ltd **Dec 2023 - May 2024**
- Gained hands-on experience in network configuration, troubleshooting, and system maintenance, applying structured problem-solving to support reliable system operation.
- Developed practical IT support and technical troubleshooting skills in a real-world environment.

Projects

Credit Card Fraud Detection
- *Python · Machine Learning* – Designed and implemented a machine learning system applying data preprocessing, predictive modeling, and algorithmic problem-solving to identify fraudulent transactions.
- Applied structured testing and evaluation to improve model accuracy and reliability.

Fake Currency Detection
- *Python · OpenCV · Machine Learning* – Developed an image-processing application integrating machine learning algorithms to detect counterfeit currency.
- Applied debugging and iterative testing to improve detection accuracy and system reliability.

Online Shopping Application
- *Full-Stack Development · SQL/DBMS* – Built a database-integrated full-stack web application implementing product browsing, cart management, and order placement using OOP-based design.
- Applied structured development practices across the SDLC, from requirement analysis to testing and deployment.

Car Price Prediction System
- *Python · Machine Learning* – Developed a predictive system applying data structures, data analysis, and algorithmic modeling to estimate vehicle prices.

Education

2024 - present Bachelor's Degree at **Parul University** (GPA: 7.2/10.0)
2021 - 2024 Polytechnic Diploma in Computer Engineering at **Aditya University** (GPA: 8/10)
